

Crispen Shiri

Global Remote Solutions Architect

CORE SKILLS

- OCI
- AWS
- Azure
- GCP
- Terraform
- Ansible
- Docker
- Kubernetes
- GitHub Actions
- LangChain
- CrewAI
- OCI GenAI
- SageMaker
- Bedrock
- Python
- TCP/IP
- VPNs
- Fortinet
- Sophos
- CCNA

CERTIFICATIONS

- Azure AZ-104
- Azure AZ-305 (In Progress)
- OCI Multicloud Architect Professional
- OCI Generative AI Professional
- OCI DevOps Professional
- OCI Developer Professional
- Udacity - Introducing Generative AI with AWS (Verified)
- Cisco CCNA
- Cisco CCNP (In Progress)
- Fortinet FCA
- ISC2 Certified Cybersecurity
- Scrum Fundamentals Certified
- ITIL v3
- Six Sigma White Belt

EDUCATION

- Bachelor of Computer Science & IT, Yenepoya University, Expected 2028

PROFESSIONAL SUMMARY

Cloud & AI/Automation architect with 15+ years delivering high-scale, multicloud solutions (OCI, AWS, Azure). Expert in automating CI/CD pipelines, implementing AI/ML workloads, and optimising cloud costs by 30-40%. Proven track record in designing scalable, fault-tolerant systems for global enterprises, enabling rapid feature rollout and operational excellence.

PROFESSIONAL EXPERIENCE

Global Remote Solutions Architect

Cretek

Jan 2020 to Present

- Designed and deployed multicloud architectures (OCI + AWS) supporting 500+ workloads, achieving 99.9% uptime and \$200k/year cost savings.
- Automated CI/CD pipelines using Terraform, Ansible, Docker, and Kubernetes, reducing deployment time from 2 hours to 15 minutes.
- Delivered cloud-native applications (Node.js, React, MongoDB) with 50% faster feature rollout across 3 continents.
- Led vendor negotiations and RFPs, optimising budgets by 25%.
- Mentored 6 DevOps engineers, improving productivity by 40%.
- Defined cloud governance and architecture standards, reducing technical debt by 30%.
- Designed LLM agent workflows reducing manual workload by 60%.
- Implemented SageMaker + Bedrock pipelines (80% faster experiment cycles).
- Built RAG pipelines using FastAPI, LangChain, and pgVector (45% accuracy improvement).

Technology Specialist

Heineken SA

Jan 2018 to Sept 2019

- Implemented disaster recovery and backup systems, improving uptime to 95%+.
- Upgraded server room infrastructure with dual fibre, failover, and backup power.
- Optimised IT workflows in ServiceNow, reducing incident resolution times by 50%.
- Conducted IT audits and vulnerability remediation, achieving compliance with enterprise standards.
- Maintained 95% compliance SLA across all systems.

Senior Infrastructure Engineer

HCL

Jan 2017 to Dec 2017

- Managed IT infrastructure for 2,000+ users, maintaining 99% production uptime across PLCs, HMI systems, and network devices.
- Implemented off-site backups and disaster recovery, reducing data loss risk by 20%.
- Enforced security through patching, endpoint hardening, and firewall management.
- Developed and maintained backup and disaster recovery routines, ensuring rapid data restoration and business continuity.

Infrastructure Engineer

Datacentrix Ltd

Jan 2015 to Dec 2016

- Designed and deployed enterprise networks (150+ distribution switches) for 2,000+ users, maintaining 99% SLA compliance.
- Managed endpoints, printers, software, and mobile devices, improving service efficiency.
- Served as escalation point for vendors, ensuring SLA adherence.
- Strengthened IT security and compliance through access controls, patch management, and policy enforcement.

Warranty Technician

Esquire Technologies

Jan 2013 to Dec 2014

- Built, deployed, and maintained client servers and networks, delivering high-performance, secure solutions.
- Performed advanced hardware diagnostics and repairs on servers, desktops, and laptops, ensuring fast turnaround and minimal client downtime.
- Conducted thorough QA testing on repaired equipment to verify stability, performance, and compliance with warranty standards before release.

KEY ACHIEVEMENTS

-
- Delivered multi-region SAP rollouts at enterprise scale, driving process standardisation, seamless cutovers, and business continuity while aligning technology delivery with global operational objectives.
 - Accelerated digital modernisation initiatives for Heineken SA, improving platform resilience, increasing business agility, and enabling scalable growth across core systems and infrastructure.
 - Designed and implemented high availability and disaster recovery architectures for mission-critical workloads, achieving aggressive RTO/RPO targets and ensuring uninterrupted business operations.
 - Led the deployment of containerised microservices with automated CI/CD pipelines, significantly improving release velocity, reliability, and environment consistency.
 - Architected and automated enterprise network deployments using Infrastructure-as-Code (Terraform), reducing configuration effort, eliminating drift, and improving audit and compliance posture.
 - Executed large-scale printer and print-server rollouts across multiple business units, standardising configurations and reducing operational overhead.
