

Everswick Dambaza

Senior Consultant

CORE SKILLS

- Enterprise Architecture
- Data Architecture
- Software Engineering
- AI Process Engineering
- Data Analysis
- Data Lakes
- Data Warehouses
- Data Governance
- Analytics
- Intelligent Automation
- Business Process Management (BPM)
- iBPMS
- Artificial Intelligence (AI)
- Machine Learning (ML)
- Robotic Process Automation (RPA)
- Microsoft Azure
- Microsoft Copilot Studio
- Power Automate
- Microsoft 365
- SharePoint

CERTIFICATIONS

- Java OCJP

EDUCATION

- Bachelor of Science (B.Sc.) in Computer Science and Informatics, University of Johannesburg, 2014

PROFESSIONAL SUMMARY

Experienced IT professional specialising in Enterprise Architecture, Data Architecture, and Intelligent Automation. Proven track record in delivering transformative solutions across Banking, Stock Markets, and Digital Marketplaces. Expertise in aligning technology with business goals, simplifying complexity, and driving operational efficiency. Skilled in leading cross-functional teams, navigating change, and implementing scalable, data-driven solutions that deliver long-term value.

PROFESSIONAL EXPERIENCE

Senior Consultant

Ushauri Digital Consulting

January 2026 - Present

- Led enterprise data initiatives and digital transformation projects, leveraging expertise in Enterprise Architecture, Data Architecture, and AI Process Engineering.
- Trained and guided teams in translating business needs into data-driven solutions, including the design of data lakes and data warehouses.
- Conducted data discovery, profiling, and lineage documentation to ensure data quality and usability for analytics.
- Contributed to process automation initiatives, enhancing decision-making through dashboards, reports, and analytical models.
- Strengthened data governance and intelligent automation practices across client organisations.

AI Process Automation Engineer

Escropay

January 2025 - December 2025

- Designed and implemented intelligent automation solutions using iBPMS, AI, ML, and RPA technologies.
- Streamlined business operations by automating repetitive tasks and incorporating AI for decision-making and anomaly detection.
- Leveraged Microsoft tools, including Azure, Copilot Studio, Power Automate, and SharePoint, to enhance automation capabilities.

Digital Transformation Consultant

KaribuTech AI

August 2024 - December 2024

- Aligned technology with business goals to enhance efficiency, reduce costs, and deliver value for CBZ Holdings.
- Implemented automated workflows to streamline operations and improve service delivery.
- Conducted gap analyses and reengineered processes for agility and responsiveness to customer needs.
- Applied lean principles to eliminate inefficiencies and foster continuous improvement.

Senior Software Engineer

Webdev Zimbabwe

July 2023 - July 2024

- Developed and managed software projects, including a CRM component for the property market.
- Integrated complex systems to support digital transformation initiatives.
- Leveraged Generative AI to automate property listing descriptions, enhancing operational efficiency.
- Optimised database performance through query enhancements and caching mechanisms.
- Mentored junior developers to ensure team growth and knowledge transfer.

Lead Software Engineer

Zimbabwe Stock Exchange

August 2020 - December 2022

- Led a team of developers in creating business applications and retail trading platforms.
- Enhanced trading platforms for capital markets, including the integration of payment gateways.
- Conducted ITIL training to improve IT Service Management and service delivery.
- Managed vendor communications and third-party integrations to enhance system functionality.

Business Intelligence Consultant

Inhance Supply Chain Solutions

January 2019 - December 2019

- Designed and implemented advanced SQL solutions to support supply and demand planning.
- Developed data pipelines and reporting solutions using SSRS and SSIS.
- Conducted in-depth data analysis to improve decision-making across supply chain functions.

Intermediate BPM and SQL Consultant

Absa Group

January 2018 - December 2018

- Enhanced operational efficiency through IBM BPM process orchestration.
- Managed API lifecycle and governance with API Connect.
- Developed open-source proofs of concept for BPM and database products.

BPM and SQL Consultant

Absa Group

January 2016 - December 2017

- Modelled processes using SOA and BPMN notation.
- Automated back-office processes for the ABSA Digital Service Platform.
- Implemented service transformations using IBM DataPower to optimise data handling.

Information Technology Lecturer

International Training College - Lingua

April 2015 - December 2015

- Trained students in web application development using .NET and Java technologies.
- Provided IT support for college systems and trained staff on school management systems.

.NET Developer

MyBizzSpace (Pty) Ltd

August 2013 - December 2014

- Developed .NET-based web applications and wholesale distribution management systems.

KEY ACHIEVEMENTS

- Delivered transformative digital solutions across multiple industries, including Banking and Stock Markets.
- Implemented intelligent automation solutions, reducing operational inefficiencies and enhancing decision-making.
- Led the development of scalable data platforms, including data lakes and warehouses, to support analytics.
- Optimised database and system performance, improving operational efficiency and user experience.
- Mentored and guided cross-functional teams, fostering collaboration and ensuring successful project delivery.
