

Heinrich Muller

Senior Platform Engineer / Cloud Architect

CORE SKILLS

- Azure DevOps
- GitHub Actions
- Terraform Enterprise
- Azure Virtual WAN
- Virtual Network Manager
- ExpressRoute
- BGP
- Azure Firewall
- Palo Alto NGFW
- Kubernetes (AKS, RKE)
- Helm
- Vault & Consul federation
- RBAC automation
- Azure Policy-as-Code
- Sentinel KQL
- Defender for Cloud
- Snyk
- Checkov
- TFSec
- Advanced PowerShell
- Python
- Bash
- Ansible
- AWS EKS
- Cloud Networking

CERTIFICATIONS

- RHCSA
- CCNA
- Advanced PowerShell
- Collibra Architect
- Manta Architect
- CBP Project Management
- CompTIA A+ Hardware
- CompTIA A+ Software
- CompTIA Network+ Theory
- CompTIA Network+ Practical
- Microsoft AZ104 (course completed)
- Microsoft AZ305 (course completed)

EDUCATION

PROFESSIONAL SUMMARY

Senior Cloud Specialist with over 10 years of experience in engineering enterprise infrastructure, multi-region Azure platforms, and regulated financial environments. Expert in Azure DevOps, Terraform Enterprise, Kubernetes, and large-scale CI/CD architecture. Adept at designing scalable cloud platforms, enforcing policy-driven governance, and automating operational processes to optimise efficiency.

PROFESSIONAL EXPERIENCE

Senior Platform Engineer / Cloud Architect

Vaxowave

2025 - Present

- Architected and engineered 'Metropolis,' a 25,000+ line multi-cloud enterprise landing zone spanning Azure and AWS.
- Implemented Azure Virtual WAN with secured hubs, zone-redundant Azure Firewall, and ExpressRoute gateways.
- Designed multi-cloud networking solutions integrating Azure VWAN, Alkira SD-WAN, and AWS Cloud WAN via BGP overlay.
- Automated Terraform Enterprise workflows, including API integration, workspace management, and CI/CD pipelines.
- Developed predictive remediation and threat prevention rules in Microsoft Sentinel using KQL and ML algorithms.
- Engineered FinOps dashboards for cost forecasting, budget variance detection, and executive reporting.

Cloud DevOps Engineer

Nintex

Apr 2024 - 2025

- Automated disaster recovery processes for App Services, SQL, Redis, and other Azure resources.
- Re-architected GitHub Actions workflows, consolidating split-region ARM deployments into unified pipelines.
- Migrated pipelines to OIDC federation, eliminating dependency on expiring app secrets.
- Implemented Azure Front Door routing updates for seamless traffic failover during disaster recovery events.

Senior Cloud DevOps Engineer

DigiOutsource

Sep 2023 - Apr 2024

- Managed 33 Kubernetes clusters (RKE and AKS) across the enterprise estate.
- Redesigned CI/CD pipelines, reducing deployment time by 50% and increasing release frequency by 75%.
- Automated Vault and Consul deployment with multi-cluster federation across Kubernetes estates.
- Engineered Helm pipelines for standardised application deployment across new RKE

clusters.

Senior Software Engineer

Entersekt

Oct 2022 - Aug 2023

- Provided Tier 3 global support for production incidents across an international client base.
- Developed diagnostic automation scripts to standardise triage and reduce investigation time.
- Implemented system and application monitoring using Zabbix, Grafana, and Kibana.

Data Systems Engineer

Capitec Bank

Jun 2020 - Sep 2022

- Led zero-downtime migration of Colibra and Manta platforms to AWS EKS using a blue-green strategy.
- Optimised Kubernetes autoscaling and cost management across EKS infrastructure.
- Engineered middleware components for Colibra PowerBI API integration.

Systems Engineer

Capitec Bank

Nov 2016 - Jun 2020

- Managed a 500+ server estate across VMware vSphere and Hyper-V environments.
- Reduced manual intervention by 70% through PowerShell, Bash, and Ansible automation.
- Designed and validated disaster recovery procedures across the server estate.

2nd Line Support Engineer

ITLab (UK MSP)

Aug 2015 - Oct 2016

- Provided remote support for 6,000+ client servers, resolving hardware, software, and network incidents.
- Led migration projects for 200+ companies from on-premises Exchange to Office 365.
- Supported virtualisation environments, including VMware, Hyper-V, and Citrix.

2nd Line Support Engineer

EnablesIT (UK MSP)

Sep 2014 - Aug 2015

- Handled Tier 2 escalations for Active Directory, Exchange, and Office 365 environments.
- Supported VMware ESXi, Hyper-V, and various backup solutions for client infrastructure.
- Ensured SLA compliance and maintained high standards of client communication.

KEY ACHIEVEMENTS

-
- Architected a 25,000+ line multi-cloud enterprise landing zone for Azure and AWS.
 - Reduced deployment time by 50% and increased release frequency by 75% through CI/CD redesign.
 - Led zero-downtime migration of critical platforms to AWS EKS using blue-green

strategies.

- Developed predictive remediation and threat prevention rules in Microsoft Sentinel.
- Automated disaster recovery processes for multi-region Azure resources.
