

Hussein Banda

Comprehensive ICT Support Engineer

CORE SKILLS

- Cybersecurity
- Ethical Hacking
- Footprinting and Reconnaissance
- Network Scanning
- Nmap
- Vulnerability Assessment
- Privilege Escalation
- Malware Analysis
- Social Engineering
- Phishing Simulation
- Cryptography
- Incident Response
- Risk Mitigation
- TCP/IP
- DNS
- DHCP
- VLAN Configuration
- Firewall Fundamentals
- Router Configuration
- Switch Configuration

CERTIFICATIONS

- Certified Ethical Hacker (CEH) Master - EC-Council
- Ethical Hacker - Cybrary
- Certified Phishing Prevention Specialist - Hack & Fix Academy
- CompTIA A+ - CompTIA

EDUCATION

- Bachelor of Science in Information Technology (Expected Completion: 2028)
- Grade 12 Certificate - Hillcrest Technical High School, Zambia

PROFESSIONAL SUMMARY

Cybersecurity-focused ICT professional with over six years of experience securing and supporting enterprise infrastructure in healthcare and financial environments. CEH Master certified with hands-on expertise across the ethical hacking lifecycle, including vulnerability assessment, incident response, and network security. Proven ability to reduce attack surfaces, identify misconfigurations, and secure Windows and network environments using structured defensive and offensive methodologies. Actively engaged in continuous learning through platforms like TryHackMe (Top 20% globally) and EC-Council iLabs. Seeking a role as Security Analyst, SOC Analyst, or Junior Penetration Tester.

PROFESSIONAL EXPERIENCE

Comprehensive ICT Support Engineer

Ndala ICT Solutions

Feb 2020 - Present

- Secured over 200 enterprise Windows endpoints through structured patching, firmware upgrades, and security configuration, reducing vulnerability exposure by approximately 35%.
- Identified and remediated Active Directory misconfigurations, weak permissions, and DNS inconsistencies, reducing lateral movement risk.
- Conducted Layer 2/3 troubleshooting with a security-first approach, identifying rogue DHCP risks, VLAN misconfigurations, and segmentation weaknesses.
- Assisted with security incident triage through log review, endpoint diagnostics, and traffic analysis.
- Implemented secure configurations for Microsoft Teams Rooms and VoIP systems supporting executive-level environments.
- Maintained governance documentation including network diagrams, asset inventories, and audit-ready change records.

KEY ACHIEVEMENTS

- Achieved Top 20% global ranking on TryHackMe with 31+ completed rooms and 4 badges.
- Completed all 20 modules of EC-Council Official iLabs, demonstrating structured penetration testing competency.
- Designed and executed a phishing simulation campaign, reducing simulated click-through rates by 70%.
- Built an offensive security home lab for exploitation and post-exploitation practice, enhancing defensive awareness.
