

James Julius

Senior Software Engineer

CORE SKILLS

- Ruby
- Java
- JavaScript
- Python
- C++
- HTML
- CSS
- Rails
- Node.js
- MySQL
- PostgreSQL
- MongoDB
- Git
- Linux
- Docker
- AWS
- Distributed Systems
- Performance Optimisation
- Backend Architecture

EDUCATION

- B.S. in Computer Engineering, Mathematics Minor - Northwestern University, June 2013

PROFESSIONAL SUMMARY

Highly skilled Backend Engineer with over a decade of experience in designing and implementing scalable, high-performance distributed systems. Proficient in a wide range of programming languages and technologies, including Ruby, Java, JavaScript, Python, and C++. Adept at building robust backend architectures, optimising system performance, and mentoring engineering teams. Passionate about solving complex technical challenges and contributing to open-source projects.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

PayPal (via acquisition by Braintree)

2013 - Present

- Built and maintained highly scalable payment processing services used by merchants worldwide.
- Led the design and implementation of new transaction routing logic, reducing latency by 30% and improving system reliability.
- Developed fraud detection tools by integrating third-party services and implementing real-time monitoring and alerting.
- Mentored junior engineers, conducted code reviews, and promoted best practices in testing and deployment.
- Collaborated with product and operations teams to define requirements and deliver high-impact features.

Software Engineering Intern

Groupon

Summer 2012

- Developed internal tools for operations teams, including data dashboards and automated reports.
- Contributed to RESTful API development within a distributed microservices environment.

Software Engineering Intern

GrubHub

Summer 2011

- Implemented features for consumer-facing web applications, focusing on performance and usability.
- Optimised database queries and refactored legacy code to improve system efficiency.

KEY ACHIEVEMENTS

- Reduced transaction latency by 30% through the implementation of optimised routing logic.
- Designed and deployed scalable payment processing services used globally by merchants.

- Developed and maintained open-source libraries in Ruby and JavaScript, widely adopted by the developer community.
- Mentored junior engineers, fostering a culture of collaboration and continuous improvement.
