

Jonas Mokgaola Nkosinathi Thamane

Junior Data Analyst

CORE SKILLS

- SQL
- Data Cleaning & Transformation
- Exploratory Data Analysis
- Data Modelling
- ETL/ELT Pipelines
- Azure SQL
- CosmosDB
- Snowflake
- Data Warehousing
- Power BI
- DAX
- Power Query
- Microsoft Fabric
- Tableau
- Python
- SQL Server
- HTML
- CSS
- JavaScript
- Power Apps
- Stakeholder Engagement
- Technical Reporting
- Data Quality & Governance

CERTIFICATIONS

- Microsoft Certified Power BI Analyst
- Microsoft Certified Security Operations Analyst
- Microsoft Certified Power Platform Developer
- Microsoft Certified Azure Database Administrator
- Microsoft Certified Fabric Data Engineer
- Microsoft Certified Azure Data Engineer

EDUCATION

- Bachelor of Education in Accounting and Business

Management, Tshwane

PROFESSIONAL SUMMARY

Highly skilled Data Engineer and Business Intelligence Developer with expertise in data cleaning, transformation, modelling, and visualisation. Proficient in leveraging tools such as Power BI, Microsoft Fabric, Azure SQL, and Python to deliver actionable insights and optimise data workflows. Adept at building scalable data pipelines and collaborating with cross-functional teams to meet business objectives. Certified in multiple Microsoft technologies, ensuring a robust foundation for data-driven decision-making.

PROFESSIONAL EXPERIENCE

Junior Data Analyst

Alchemy Health Technologies

June 2025 - February 2026

- Developed and maintained dashboards in Power BI to visualise healthcare service provider data and insights.
- Supported automation workflows using Power Automate and developed applications using Power Apps and D365 CRM.
- Assisted in building data models and reports leveraging Microsoft Fabric and multiple cloud services.
- Collaborated with teams to translate healthcare requirements into actionable analytics and insights.
- Loaded and transformed data using Power Query and visualised the cleaned data in Power BI.

WSP Data Administrator

ETDP-SETA

February 2025 - June 2025

- Provided support to stakeholders on the completion and submission of WSP/ART/PIVOTAL reports.
- Assisted in data migration processes from Indium to AIMS.
- Guided employers on OFO code matters related to WSPR submissions.
- Maintained and retrieved records from ETD databases.
- Built and maintained data systems and pipelines for analytical purposes.

Data Analyst/Data Engineer Trainee

Mecer Inter-Ed

August 2024 - January 2025

- Collected, processed, and analysed data to support informed decision-making.
- Designed, built, and maintained data pipelines, data warehouses, and lakehouses ensuring accurate and efficient storage.
- Collaborated with stakeholders to gather requirements, create data visualisations, and generate actionable insights.
- Utilised SQL, ETL processes, data modelling, and tools such as Python, Fabric, Power BI, and Tableau to drive data-driven solutions.
- Managed optimised workflows within assigned teams.

KEY ACHIEVEMENTS

- Successfully developed and deployed Power BI dashboards to improve decision-making in healthcare analytics.
- Streamlined data migration processes and ensured data integrity during transitions between systems.
- Built scalable data pipelines and warehouses to support business intelligence and analytics initiatives.
- Earned six Microsoft certifications, demonstrating expertise in data engineering, business intelligence, and platform development.
