

Juliet Ngoni

Cloud Support Associate

CORE SKILLS

- Networking
- Network Security
- Storage
- Relational Databases
- Non-Relational Databases
- MySQL
- NoSQL Databases
- Linux
- Windows
- Ubuntu
- Kali Linux
- Java
- Python
- Web Application Penetration Testing
- Bug Bounty
- Social Engineering
- Brute-Force Attacks
- Firewalls
- IDS
- IPS
- AWS Services
- Azure Security Services
- Microsoft 365

CERTIFICATIONS

- Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure Security Engineer Associate
- Microsoft 365 Certified: Fundamentals
- Microsoft Certified: Azure AI Fundamentals
- Cyber Security Awareness Professional Certificate (CAPC)
- AWS Certified Solutions Architect - Associate
- AWS Certified AI Practitioner

EDUCATION

- Advanced Diploma/Bachelor in Information Technology (Part-Time), Tshwane University of Technology,

PROFESSIONAL SUMMARY

Focused and results-driven IT professional with strong expertise in Networking, Cybersecurity, Cloud Computing, and Database Management. Proficient in a wide array of technologies including AWS, Azure, Linux, Windows, and programming languages such as Java and Python. Experienced in penetration testing, vulnerability assessments, and cloud security, with a proven ability to troubleshoot complex technical challenges and deliver innovative solutions. Adept at working in cross-functional teams and committed to driving technological advancements with precision and innovation.

PROFESSIONAL EXPERIENCE

Cloud Support Associate

Amazon Web Services (AWS)

02/2025 - 08/2025

- Resolved customer cases by troubleshooting AWS services such as EC2, VPCs, Load Balancing, Elastic IPs, Route 53, and S3 Bucket.
- Managed security services including Identity and Access Management, AWS Key Management Service, and AWS CloudTrail for auditing.
- Administered Linux systems, user access, and SSH troubleshooting.
- Utilised serverless services such as Lambda, API Gateway, and Bedrock for project implementations.
- Collaborated with cross-functional teams on the Support Automation Workshop (SAW) project to automate AWS support operations.

Cyber Security Analyst

Risc Technology Integration

07/2024 - 01/2025

- Conducted vulnerability scanning, risk assessments, and identified potential weaknesses in systems.
- Monitored and maintained compliance checks on passwords, policies, credentials, and applications.
- Escalated and resolved security incidents while maintaining accurate security documentation.
- Evaluated new security tools and technologies to enhance organisational security posture.

Technical Support Intern

Gijima Holdings, GDE

05/2023 - 04/2024

- Provided technical support by assisting users with troubleshooting and resolving technical issues.
- Managed access and network resources using Active Directory.
- Configured devices, added and removed users, and managed network settings such as IP addresses and domain configurations.
- Performed hardware setup, including LAN cable connections and configuring printers

and telephones.

Cyber Security Trainee

Council for Scientific and Industrial Research (CSIR)

11/2022 - 11/2022

- Participated in hands-on training on cyber security and analysis, including penetration testing and security patching.
- Identified and mitigated malware, ransomware, and phishing threats.
- Performed social engineering, reverse engineering, and incident response in simulated workplace scenarios.
- Gained expertise in multi-factor authentication, privileged access management, and device information disposal.

KEY ACHIEVEMENTS

- Awarded 'Huawei Excellent Student (Cloud Track)' in February 2023.
- Contributed to the Support Automation Workshop (SAW) project at AWS, automating support operations through standardised runbooks.
- Achieved multiple industry-recognised certifications, including AWS Certified Solutions Architect - Associate and Microsoft Certified: Azure Security Engineer Associate.
