- Certified Bittitan MigrationWiz for MS365

PROFESSIONAL SUMMARY

Experienced Cloud Solutions Architect with a proven track record of delivering enterprise migration projects and deploying solutions across multi-cloud environments. Specialises in seamless transitions, optimising collaboration, and ensuring secure and scalable cloud services. Proficient in Microsoft Azure, Microsoft 365, Google Cloud Platform, and Fortinet technologies, with strong expertise in disaster recovery, identity and access management, and solution design.

PROFESSIONAL EXPERIENCE

Cloud Delivery Engineer

Liquid Intelligent Technologies (Liquid C2)

April 2025 - Present

- Delivered enterprise migration projects and deployed solutions across multi-cloud environments.
- Specialised in seamless transitions, optimising collaboration, and ensuring secure and scalable cloud services.
- Led mailbox, document, public folder, personal archive, and collaboration platform migrations.
- Managed hybrid Exchange and Active Directory migration projects.
- Configured and deployed services across public multi-cloud platforms including Azure, AWS, and GCP.
- Enhanced security and performance in hybrid environments.

Solutions Architect

Landynamix

July 2023 - April 2025

- Assessed and understood technical causes of business problems to design effective solutions.
- Developed solution options aligned with client requirements to address business challenges.

Presales Engineer

First Distribution

November 2021 - July 2023

- Designed and built technical solutions by aligning with partner technologies.
- Identified client requirements through research and analysis.
- Supported service providers with tailored solutions and provided technical consultation.
- Kept up-to-date with new product releases and articulated roadmaps to account managers.
- Advised clients on product trends and features to support business growth.

Site Engineer

Huawei

November 2020 - October 2021

- Ensured RF test equipment was calibrated to industry standards.
- Tested wireless network performance and resolved network issues.
- Travelled to customer locations and field sites to ensure regulatory compliance.

Business Analysis Trainee

Mindworx Academy

March 2020 - October 2020

- Defined and created databases and related tables.
- Manipulated and controlled data using SQL commands.
- Queried database structures to extract specific information.

KEY ACHIEVEMENTS

- Successfully led multiple enterprise-level migration projects across multi-cloud environments.
- Achieved expert-level certifications in Azure and Google Cloud technologies.
- Designed and implemented scalable and secure cloud solutions for diverse business needs.
- Streamlined hybrid Exchange and Active Directory management for large organisations.
- Provided technical leadership in presales, enabling clients to adopt innovative cloud solutions.
