

Lesiba Serite

Cloud Solutions Architect

CORE SKILLS

- Microsoft Azure
- Huawei Cloud Platform
- Terraform
- ARM Templates
- Bicep
- PowerShell
- Azure CLI
- C#
- SQL
- HTML
- CSS
- Microsoft Defender for Cloud
- Entra ID
- Privileged Identity Management (PIM)
- Azure Policy
- CAF Landing Zones
- Well-Architected Framework
- Hybrid Cloud Architecture
- Multi-cloud Architecture
- Azure Networking

CERTIFICATIONS

- Microsoft Certified: Azure Solutions Architect Expert (AZ-305)
- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Administering Windows Server Hybrid Core Infrastructure (AZ-800)
- Microsoft Certified: Azure Virtual Desktop Specialty (AZ-140)
- Huawei Certified Cloud DevOps Professional (HCCDP): Cloud Migration
- Huawei Certified Cloud DevOps Professional (HCCDP): Solution Architecture

EDUCATION

PROFESSIONAL SUMMARY

Azure Solutions Architect with 4 years of experience designing and delivering enterprise cloud infrastructure across hybrid, multi-cloud, and greenfield environments. Specialises in landing zone design, identity and governance architecture, and translating complex business requirements into secure, scalable Azure solutions. Equally effective in pre-sales, delivery, and advisory contexts.

PROFESSIONAL EXPERIENCE

Cloud Solutions Architect

Altron Digital Business

November 2024 - Present

- Led architecture discovery workshops to define cloud strategy, migration approach, and platform architecture for enterprise customers.
- Designed Azure and hybrid cloud architectures covering networking, identity, governance, and security controls - translating business requirements into secure, scalable designs.
- Developed reference architectures, cost models, and migration strategies for complex enterprise workloads.
- Architected multi-cloud solutions across Azure and Huawei Cloud environments, including proof-of-concept deployments to validate architecture patterns.
- Provided technical leadership on RFP/RFI responses and served as a trusted advisor to customers on cloud adoption, modernisation, security posture, and cost optimisation.

Cloud Engineer

Tier One Cloud Services

June 2024 - November 2024

- Contributed to architecture and deployment of Azure infrastructure solutions including compute, networking, and storage.
- Managed and optimised production cloud environments with a focus on performance, cost, and reliability.
- Supported technical pre-sales engagements and maintained service documentation and operational runbooks.
- Maintained internal cloud infrastructure and assisted with platform improvements.
- Performed code reviews and maintained service documentation and operational guides.

Microsoft Azure Specialist

First Distribution Pty (Ltd)

September 2022 - May 2024

- Conducted scoping assessments and architecture design engagements for end-clients across monolith and microservices patterns, applying Microsoft Well-Architected Framework principles.
- Served as the primary liaison between Azure Resellers and internal teams involved with the Microsoft CSP Programme, including Sales and Operations.
- Analysed customer Azure environments for cost optimisation and integrated cloud

monitoring solutions.

- Applied IAM and RBAC controls across customer environments.
- Provided after-hours support for Microsoft services through F4C (First for Cloud), ensuring high-quality service delivery and customer satisfaction.

Azure Pre-Sales Intern

First Distribution Pty (Ltd)

April 2022 - August 2022

- Managed Azure subscriptions and assigned IAM roles to ensure appropriate access control across customer environments.
- Prepared Azure pricing estimates and responded to technical queries from indirect resellers and end-customers.
- Logged and tracked advanced support cases with Microsoft; troubleshoot Azure-related technical issues.
- Processed Azure consumption reports into itemised bill files, ensuring accuracy and completeness of billing information.

KEY ACHIEVEMENTS

- Successfully designed and implemented CAF Landing Zones for multiple enterprise clients, ensuring compliance with governance and security best practices.
- Architected multi-cloud solutions integrating Microsoft Azure and Huawei Cloud platforms, enabling seamless interoperability and cost optimisation.
- Developed a comprehensive cost optimisation strategy for a large-scale Azure environment, reducing operational expenses by 25%.
- Led pre-sales engagements that resulted in securing high-value contracts for cloud migration and modernisation projects.
- Delivered technical workshops on Azure governance and identity management, enhancing customer understanding and adoption of best practices.
