- Jira
- Git
- Angular
- Flutter
- DevOps

CERTIFICATIONS

- B.Sc. Computing (Unisa)
- Microsoft Certified Professional (C#)
- AWS Certified Developer Certification
- AGILE Fundamentals
- CompTIA Network+

EDUCATION

PROFESSIONAL SUMMARY

Highly experienced IT professional with over 18 years of expertise in software development, systems architecture, and database development across diverse industries including education, manufacturing, retail, and banking. Proficient in .NET technologies, AWS cloud services, and Agile methodologies, with a proven track record of delivering resilient, scalable, and innovative solutions. Adept at leading technical teams, defining architectural frameworks, and implementing best practices to drive business success.

PROFESSIONAL EXPERIENCE

Solutions Architect - Payments

Capitec Bank

Aug 2024 - Current

- Designed and implemented payments applications to support business objectives.
- Defined technology solutions for the payments environment, ensuring alignment with business requirements.
- Created comprehensive technical specifications from business requirements.
- Conducted industry research to evaluate architectural and design patterns.
- Developed and maintained frameworks for application development using the latest OOP technologies.
- Mentored and trained technical personnel to enhance team capabilities.

Technical Lead - Payments

Capitec Bank

Mar 2023 - Jul 2024

- Led a multidisciplinary team through technical, design, deployment, and support challenges.
- Established best practices and roadmaps for payments IT implementation.
- Performed performance and optimisation analyses to identify and implement improvements.
- Defined and maintained development standards and cost management strategies.
- Provided a robust platform for developers, analysts, and testers to collaborate effectively.
- Mentored and trained team members to enhance technical proficiency.

Analyst Developer - Payment Systems

Capitec Bank

Jul 2020 - Feb 2023

- Conducted systems analysis, development, and support for banking payment systems.
- Developed serverless solutions using AWS services including Lambda, SQS, RDS, and DynamoDB.
- Executed data ETL processes to transform NoSQL data into relational databases for analytics.
- Provided DevOps support, ensuring efficient software development, testing, and deployment.

- Supported junior developers and software testers in technical tasks and troubleshooting.
- Delivered 24/7 standby support for payment systems.

Systems Developer

Tradelink Retail Systems

Aug 2015 - Jun 2020

- Developed and maintained POS software solutions in the .NET environment.
- Integrated POS systems with third-party solutions such as mobile money and EFT payment services.
- Designed and implemented RESTful web services and self-hosted applications.
- Applied SDLC principles to investigate, design, and test software developments.
- Provided support to business and systems analysts.

Systems Developer - C# & SQL

Kratos Software

Dec 2009 - Jul 2015

- Developed and maintained software solutions using C# and SQL.
- Collaborated with cross-functional teams to deliver robust software applications.
- Implemented and supported system integrations for various business processes.

IT Consultant

Strictly Corp Technology

Dec 2008 - Nov 2009

- Provided IT consultancy services to retail and commercial clients.
- Implemented and supported IT systems to improve operational efficiency.

IT Trainer

CCSIT Training Center

Jul 2008 - Nov 2008

- Delivered IT training courses to students and professionals.
- Developed training materials and conducted workshops on various IT topics.

IT Technician

Aurex Pvt Limited

Jan 2007 - Apr 2008

- Provided technical support and maintenance for IT systems.
- Managed IT infrastructure and ensured system reliability.

Analyst Programmer

Zimbabwe Open University

Oct 2005 - Dec 2006

- Developed and maintained software applications for university operations.
- Collaborated with academic and administrative staff to meet IT needs.

Graduate Trainee

Cotton Company of Zimbabwe

May 2003 - Mar 2005

- Gained hands-on experience in IT systems and software development.
- Supported IT operations and contributed to software projects.

KEY ACHIEVEMENTS

- Implemented Capitec Rapid Payment Project, enabling immediate payment rails within South Africa's banking industry.
- Developed Cash Guard systems integrated with Point-of-Sale machines.
- Designed and implemented a mobile payment system integration for Kenyan markets.
- Created a 3D-based quotation and estimating software for Massmart Business division.
- Developed job tracking software for the roof design process for Massmart Truss Business division.
- Implemented a scan-able examination and registration form using DRS scanning software.
