

CORE SKILLS

- Power BI
- Alteryx
- Microsoft Excel
- SQL Server
- MySQL
- Stored Procedures
- CTEs
- Query Optimization
- Python
- Pandas
- NumPy
- Java
- ETL Development
- Data Cleaning & Transformation
- Dashboard Design
- Ad Hoc Analysis
- Data Validation

CERTIFICATIONS

- Alteryx Designer Core Certification - Alteryx
- Intermediate SQL - DataCamp
- Machine Learning Fundamentals Micro-Credential - Alteryx
- Alteryx Auto Insights Micro-Credential - Alteryx
- AWS Cloud Practitioner - Amazon Web Services
- Data Analytics Essentials - Coursera / CAPACITI
- Data Engineering Essentials - Coursera / CAPACITI
- IBM Cloud Data Science Tools - IBM

EDUCATION

- BSc Computer Science & Mathematics - Walter Sisulu University, December 2024

PROFESSIONAL SUMMARY

Results-driven Data Analyst with hands-on experience transforming complex, unstructured data into actionable insights within high-stakes audit environments. Proven expertise in building Power BI dashboards, optimising SQL stored procedures for data transformation, and engineering automated ETL workflows using Alteryx. Adept at managing large, inconsistent datasets from multiple sources, delivering accurate analysis to support audit and compliance processes.

PROFESSIONAL EXPERIENCE

Data Analyst Trainee

Auditor-General of South Africa

May 2025 - Present

- Designed and developed interactive Power BI dashboards to translate audit data into actionable insights for stakeholders.
- Optimised SQL stored procedures and queries for data extraction, cleaning, and transformation across multiple source systems.
- Engineered automated ETL workflows in Alteryx, streamlining data preparation and improving data reliability.
- Standardised large, complex datasets from auditors in various formats, ensuring data accuracy and consistency for reporting.
- Managed high-volume ad hoc data requests with tight turnaround times to support audit decision-making processes.
- Applied data quality checks and validation techniques to identify anomalies, gaps, and inconsistencies before reporting.

Data Analytics Learnership

CAPACITI

Feb 2025 - Apr 2025

- Completed intensive Data Analytics & Engineering learnership programme through Coursera, earning certifications in Data Analytics Essentials and Data Engineering Essentials.
- Applied Python libraries such as Pandas and NumPy for data manipulation, analysis, and cleaning operations.
- Executed hands-on data engineering exercises focused on data pipeline fundamentals and best practices.

KEY ACHIEVEMENTS

- Developed automated ETL workflows in Alteryx, reducing manual effort and improving data reliability.
- Designed Power BI dashboards that enhanced audit decision-making processes by translating complex data into actionable insights.
- Earned multiple certifications in data analytics, engineering, and cloud technologies,

demonstrating commitment to continuous professional development.
