PROFESSIONAL SUMMARY

Versatile and detail-oriented Software Developer with over 3 years of experience in building high-performance systems. Proficient in Laravel, Spring Boot, and ASP.NET, with a strong focus on API development, system integration, and enterprise fintech solutions. Adept at delivering scalable applications and providing technical support. Passionate about solving real-world problems through clean, secure, and well-documented code.

PROFESSIONAL EXPERIENCE

Software Developer

FN Software Solutions

November 2022 - Present

- Maintained and enhanced a large-scale application for financial processing.
- Improved and supported a direct salary deduction system for institutions and banks.
- Led cross-platform integration between banking software and employer systems.
- Provided mentorship to junior developers and contributed to internal documentation.
- Offered technical support for an electrical voucher distribution system handling over 1,000 transactions daily.
- Served as the integrations lead, providing technical support for API integrations.

Junior Software Developer

Freelance Projects

January 2020 - February 2022

- Developed an NGO ERP system to streamline organisational processes.
- Created a comprehensive school management system with modules for student management, payment processing, and library management.
- Built a mobile point-of-sale application for small businesses.
- Worked as a part-time script developer for ZOHO integrations.

KEY ACHIEVEMENTS

- Successfully integrated civil registry APIs with loan management systems.
- Played a pivotal role in developing a multi-microfinance-bank loan market and loan management system.
- Designed and implemented a Savings and Credit Cooperative Society System.
- Delivered a fintech platform (Ndasenda Pay) enabling employees to access loans via direct payroll deductions.
- Led the development of a multi-tenant school management system with a dynamic SMS engine.
- Built a sports talent hunt system using Laravel, JWT, and Flutter.
