

Ronald Sidney Doyle

Director/Owner - Chief Technologist

CORE SKILLS

- Cisco ACI
- MPLS
- Cisco ASA to FTD migration
- Cisco DNA
- Cisco Identity Services Engine
- Cisco vBNG
- ASR9000
- Nexus 7000
- Fortinet Firewall
- Software Defined Networks
- Service Provider Networks
- Data Centre Networking
- Enterprise Networks
- WAN Design
- Security Solutions
- Virtualization
- Unified Communications
- Wireless Technologies
- Network Management
- WAN Optimization

CERTIFICATIONS

- Cisco Certified Internetwork Expert (CCIE) Routing and Switching
- Cisco Certified Design Professional (CCDP)

EDUCATION

- Cisco Certified Internetwork Expert (CCIE) Routing and Switching, Cisco Systems, March 2000
- Cisco Certified Design Professional (CCDP), Cisco Systems, Nov 1999

PROFESSIONAL SUMMARY

Accomplished Network Architect and Senior Network Engineer with over 30 years of experience, including 20 years in consulting roles. Expert in designing, deploying, and migrating complex enterprise, service provider, and data centre networks using Cisco, Fortinet, and leading SDN technologies. Proven track record in delivering large-scale projects across public and private sectors, with deep expertise in network security, WAN design, and next-generation infrastructure transformation.

PROFESSIONAL EXPERIENCE

Director/Owner - Chief Technologist

Anchornet PTY LTD

Jan 2018 - Present

- Led consultation and implementation of advanced networking technologies for enterprise, data centre, and service provider clients.
- Directed multi-site Cisco ACI deployments for government and private sector clients, including State IT Agency, South African Revenue Services, and Cell C.
- Oversaw successful migration of Nexus 7000 infrastructure to Cisco ACI, ensuring seamless service cutover and minimal disruption.
- Designed and delivered MPLS integration with ASR9000 and vBNG solutions for major telecoms.
- Implemented Cisco DNA and Identity Services Engine for enhanced network automation and security.
- Delivered high-availability Fortinet Firewall solutions and disaster recovery designs for higher education clients.

General Manager - Chief Technologist

TouchNet Telecoms

May 2017 - Dec 2018

- Directed data centre design and implementation for ISP operations.
- Set technology direction and managed vendor/partner relationships.
- Oversaw sales and operational management, ensuring alignment with business objectives.

Principal Consultant

Bytes Technology Group

Nov 2008 - Apr 2017

- Headed solution architecture and sales enablement for ISP and enterprise clients.
- Designed and delivered MPLS VPN, SDN, security, and unified communications solutions.
- Consulted on large-scale WAN and service provider network projects, optimising network performance and security.

Pre Sales Engineer

Sourcecom / Tecor

Oct 2003 - Dec 2007

- Designed and implemented WAN/LAN and data centre solutions for government and public sector clients.
- Delivered secure, scalable network architectures including unified communications and wireless technologies.
- Acted as primary Cisco technology supplier for key government departments.

Pre Sales Engineer

Spescom

Jan 2001 - Sept 2003

- Consulted on WAN/LAN and unified communications solutions for enterprise clients.
- Delivered network management and optimisation projects, enhancing operational efficiency.

Consulting Engineer

Red Brigade

Jun 2000 - Dec 2000

- Delivered WAN/LAN and security solutions for ISPs and enterprise clients in South Africa and the UK.
- Specialised in ISP, BGP, and advanced LAN deployments.

Engineer

Blue Sky Networks

1996 - May 2000

- Consulted on Microsoft and IBM server technologies, specialising in SNA communications.
- Led OS/2 to NT migration projects and implemented IBM and Cisco network solutions.

Operator - Technician

First Bowring Insurance

1990 - 1996

- Managed computer centre operations and branch rollouts.
- Supported SNA communications, AS/400 operations, and Token Ring networks.

KEY ACHIEVEMENTS

- Successfully led multi-site Cisco ACI deployments for major government and telecom clients.
- Pioneered migration of legacy Nexus 7000 infrastructure to Cisco ACI, enabling next-generation data centre capabilities.
- Designed and implemented MPLS and vBNG solutions for national service providers.
- Delivered high-availability security and disaster recovery solutions for public sector and higher education.
- Recognised for expertise in complex network migrations and integration of cutting-edge Cisco technologies.
