

CORE SKILLS

- Routing and Switching
- Wireless Networking
- Network Security
- Firewall Management
- Content Filtering
- Access Control Lists (ACLs)
- TCP/IP
- Spanning Tree Protocol (STP)
- ARP
- Ethernet
- EtherChannel
- HSRP
- VLANs
- Dynamic ARP Inspection (DAI)
- DHCP
- 802.1X
- AAA
- OSPF
- EIGRP
- RIP
- Cisco ISE
- FortiGate Firewalls
- Check Point Firewalls
- Network Design
- Incident Management
- Project Delivery
- Stakeholder Engagement

CERTIFICATIONS

- CCNA (Cisco Certified Network Associate)
- CCNP (Cisco Certified Network Professional)
- CCNP Security (Cisco Certified Network Professional Security)
- NSE 1 Fortinet Certified Associate Cybersecurity
- NSE 2 Fortinet Certified Associate Cybersecurity
- NSE 3 Fortinet Certified Associate Cybersecurity
- ITIL
- AXELOS
- AZ-104 Microsoft Azure Administrator

PROFESSIONAL SUMMARY

Accomplished Network Security Engineer with over 10 years' experience designing, implementing, and supporting complex enterprise and service provider networks. Demonstrates expertise in routing, switching, wireless networking, and advanced security solutions across Cisco and Fortinet platforms. Recognised for delivering robust, scalable, and secure infrastructure solutions, leading cross-functional teams, and ensuring high service availability. Adept at managing end-to-end security incidents, lifecycle management, and driving technology adoption to meet evolving business requirements.

PROFESSIONAL EXPERIENCE

MS Security Engineer

- NTT Data, Johannesburg, South AfricaOct 2024 - Present
- Documented best security practices and developed information security design criteria and templates.
 - Performed comprehensive security assessments aligned to operational requirements.
 - Deployed, configured, and supported Cisco ISE, FortiGate, Cisco, and Check Point firewalls.
 - Administered security tools, managed lifecycle activities including break-fix, patching, and live updates.
 - Handled end-to-end security incidents and managed security controls across enterprise environments.
 - Collaborated with stakeholders, vendors, and carriers to expedite error diagnosis and resolution.
 - Ensured compliance with SOPs and maintained effective log management processes.

Specialist: Network Engineer

- Altron Systems Integration, Johannesburg, South AfricaNov 2022 - Sep 2024
- Led design and deployment of LAN and firewall solutions for high-criticality projects.
 - Acted as solutions architect, supporting Cisco Data Centre, Campus, and WAN infrastructures.
 - Implemented IPsec VPNs and provided technical solutions for third-party clients.
 - Managed FortiGate firewall configurations and Forti-Analyzer reporting for bandwidth usage.
 - Delivered wireless support for campus sites and configured wireless controllers and APs.
 - Produced documentation, implementation plans, and change logs for network modifications.
 - Provided remote and onsite support, ensuring rapid incident resolution and client satisfaction.

Network Engineer

Department of E-Government, Johannesburg, South Africa

Jun 2012 - Oct 2022

- Supported WAN and LAN infrastructure for the entire Gauteng Provincial Government.
- Provided 1st, 2nd, and 3rd line support on Cisco IP routing and switching issues.
- Monitored network performance, produced reports, and ensured quality control on installations.
- Designed and deployed VLANs, compression, and IP structures for over 60 public sector departments.
- Led the roll-out of the Gauteng Broadband Network (GBN) project, coordinating with multiple service providers.
- Maintained network patch rooms and provided ongoing support for LAN infrastructure.

Junior Network Engineer

GSSC, Johannesburg, South Africa

Feb 2011 - May 2012

- Provided first-line support for Cisco IP routing issues and escalated complex incidents.
- Monitored WAN network using SMARTS and managed calls via Unicenter Service Desk.
- Tested LAN connectivity, patched network cables, and maintained user hardware.
- Installed operating systems and provided day-to-day LAN support for end users.

Administration Clerk / Lab Coordinator

Sebetsa-o-Tholemoputso High School, Johannesburg, South Africa

Mar 2009 - Feb 2010

- Supervised and managed the computer lab, assisting students with IT queries.
- Maintained administrative records and supported database management.
- Provided basic IT support and training for learners and staff.

KEY ACHIEVEMENTS

-
- Received multiple client service awards for outstanding delivery and commitment.
 - Led the successful IOS upgrade for Gauteng Departments, coordinating with multiple service providers across 1,500 sites.
 - Designed and implemented a high-availability network solution for DEEDS Office, incorporating advanced wireless and security measures.
 - Standardised Wi-Fi deployment across MultiChoice and St Stithians College, integrating Cisco DNA Centre, ISE, and Meraki solutions.
 - Managed FortiGate firewall migrations and upgrades for multiple buildings and data centres, ensuring seamless transitions and enhanced security.
 - Delivered wireless infrastructure projects, including large-scale AP deployments and controller integrations.
