

Thato Tswai

Cloud Engineer

CORE SKILLS

- AWS Cloud Engineering
- VMware v7 Virtualisation
- Cloud Orchestration (Cloudbolt, AWS Console)
- Backup & Recovery (Acronis, Redstor, AWS Backup)
- Monitoring (PRTG, Site24x7)
- NetApp Storage (NFS, SCS)
- AWS S3
- C++, C#, HTML, SQL
- Agile Methodologies (MS Planner, Jira)
- ITIL 4 IT Management

CERTIFICATIONS

- Redstor Training Certificates
- Acronis Cloud Tech Fundamentals
- Acronis Tech Associate Cybersecurity
- Acronis Tech Associate Backup and Recovery
- AWS Cloud Practitioner: Cloud Quest
- AWS Generative AI Practitioner: Cloud Quest
- AWS Solution Architecture Associates: Cloud Quest
- AWS Cloud Practitioner Certificate
- AWS Technical Essentials Certificate

EDUCATION

- Bachelor's Degree: Information Technology in Business Systems, Rosebank College
- Higher Certificate: Information Technology in Support Services, Rosebank College

PROFESSIONAL SUMMARY

Results-driven Cloud and Infrastructure Engineer with proven expertise in AWS, VMware, backup and recovery, and monitoring solutions. Adept at supporting cloud environments, optimising operational efficiency, and implementing robust storage and backup strategies. Recognised for analytical thinking, adaptability, and delivering cost-effective solutions in fast-paced IT environments.

PROFESSIONAL EXPERIENCE

Cloud Engineer

IOCO

March 2023 - Present

- Delivered comprehensive support for cloud infrastructure, including AWS and VMware v7 environments, ensuring high availability and performance.
- Implemented and maintained backup and recovery solutions using Acronis, Redstor, and AWS Backup, improving data resilience and business continuity.
- Optimised cloud orchestration processes via Cloudbolt and AWS Console, streamlining deployment and management of virtual machines.
- Monitored system health and performance using PRTG and Site24x7, proactively identifying and resolving issues to minimise downtime.
- Administered NetApp storage (NFS, SCS) and AWS S3 object storage, enhancing data accessibility and security.
- Led patch management for Microsoft Windows OS, reducing vulnerabilities and maintaining compliance.
- Produced detailed reports on patching, backups, and anti-malware activities, supporting informed decision-making.
- Collaborated within agile teams using MS Planner and Jira, contributing to efficient project delivery.

KEY ACHIEVEMENTS

- Successfully implemented automated backup and recovery workflows, reducing manual intervention and improving data protection.
- Enhanced cloud monitoring capabilities, resulting in faster incident detection and resolution.
- Contributed to cost optimisation initiatives by streamlining cloud resource usage and storage management.
